

SANTA CLARA UNIVERSITY	ELEN 21L Spring 2022
<p align="center">Laboratory #0: Introduction and Access to the ECC For lab sections Monday-Friday September 19-23, 2022</p>	

- No Pre-lab/Lab report for this lab
- Lab Overview
 - [Lab materials] will be uploaded to Camino at least 5 days prior to the lab day.
 - [Prelab] Each student has to complete the prelab before the actual lab each week (See “PRE-LAB” of the lab material).
 - [Prelab report] Prelab reports should be submitted through Camino before the lab.
 - [Lab] Labs will be done in groups of two (group will be shuffled every week).
 - [Lab Demo] Each group should demonstrate each part of the lab experiments to the TA (See “PROCEDURE” of the lab material). In case of incomplete labs, complete them later and arrange offline or online appointments with your TA for demo.
 - [Lab Reports] Each group should write and submit a post-lab report (See “REPORT” of the lab material). Note that only one report per group needs to be submitted (two students turn in one report).
- SW tools used in the labs are available through the Engineering Computing Center (ECC)
 - Make sure that you have remote access to a design center account (We are going to use Windows platform).
 - If you have never acquired remote access prior to this, you can look here for instructions: <https://www.scu.edu/engineering/labs--research/labs/engineering-computing-center/remote-access-to-the-ecc/>
 - Pre-requisites for remote access
 - Duo
 - VPN
 - SCU username/password
